

# CreteCare Floor Polish Stripper Datasheet

Oct 2017

Page 1 of 2

Acrylic floor polish stripper / remover / cleaner of most acrylic polymer floor dressing polishes on the market.

## Technical Data

Physical state	Liquid
Appearance	Light Blue
% solid content	N/A
Specific Gravity (Density)	1.04-1.6g/cm <sup>3</sup> at 20°C
Solubility	Soluble in water
pH value at 20°C	12.00-13.00
Odour	Typical
Boiling Point	100°C

## Purpose

**CreteCare Floor Polish Stripper** is a powerful cleaning and acrylic polymer floor polish stripping medium. It contains a selection of non-ionic and anionic surfactants and glycol ethers as well as proprietary preservatives to extend the product's shelf life.

## Applications

**CreteCare Floor Polish Stripper** is:

- Applied as a cleaner / stripper on all surfaces where an acrylic polymer type floor polish has been applied
- Highly active - the reaction takes place immediately in order to save time and cut down on labour costs
- Highly concentrated - see Dilution below

## Dilution process before use

Dilute UP TO 1:5 with water (1 part **CreteCare Floor Polish Stripper** with 5 parts water); depending on the coating thickness and type of polymer.

## Masking

For best results all windows (where polish used on walls), doors and adjacent surfaces should be masked using painters masking tape (blue) and brown paper. All masking material must be removed at the end of the day's work.

## Application

Spread over the surface as needed and leave for a few minutes. Scrub and rinse well with clean water. Repeat this process where necessary.

## Shelf life & Storage

One year in ambient conditions after date of invoice.

Store between 10°C-38°C.

## Packaging

Available in 5 litre plastic containers.
